

# NAS/SAN Integration

Eighth NASA/Goddard Space Flight Center  
Conference on Mass Storage Systems and Technology  
March 30, 2000

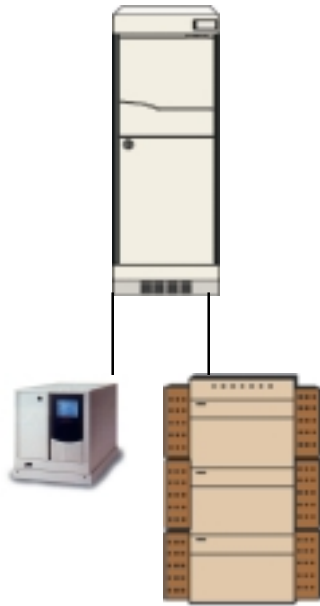

# Agenda

- ▼ Introduction
- ▼ The types and roles of storage
- ▼ Integrating storage as a business advantage
- ▼ Conclusion

# Types of Storage

Direct Attached Storage

DAS

Network Attached Storage

NAS

SAN Attached Storage

SAS

# Best fits for storage

## ▼ DAS

- Low initial cost for local storage & applications

## ▼ NAS

- Storage consolidation of UNIX and NT files
- Client access of large files, even on the internet

## ▼ SAS

- High volume movement of data off the LAN

# Storage is your business

- ▼ Holds the crown jewels
  - Intellectual property
  - Customer information
- ▼ Revenue generating center
- ▼ Disaster prevention
- ▼ Replication of data to remote locations

# Benefits of NAS today

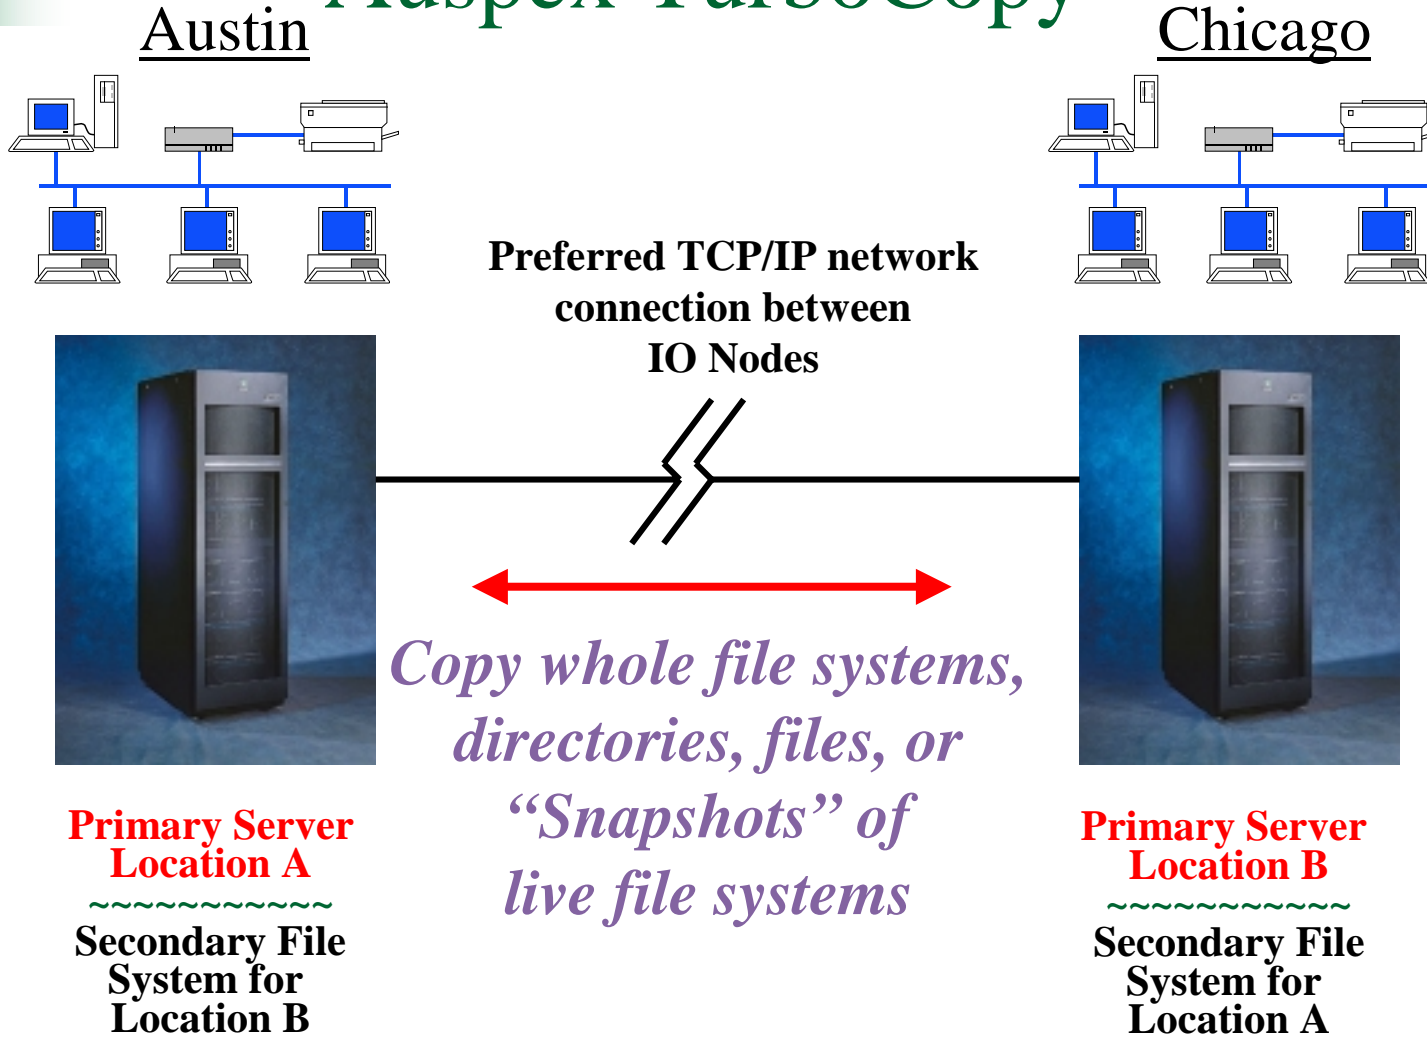

- ▼ Storage consolidation
- ▼ True data sharing for UNIX and NT
- ▼ Scalability and connectivity
- ▼ Reduced management costs
- ▼ Increased productivity
- ▼ Reduce risk
- ▼ Cut time to market

**Auspex NAS is the intelligent gateway to the SAN**

# Data replication/protection with Auspex TurboCopy

# Remote Data Replication

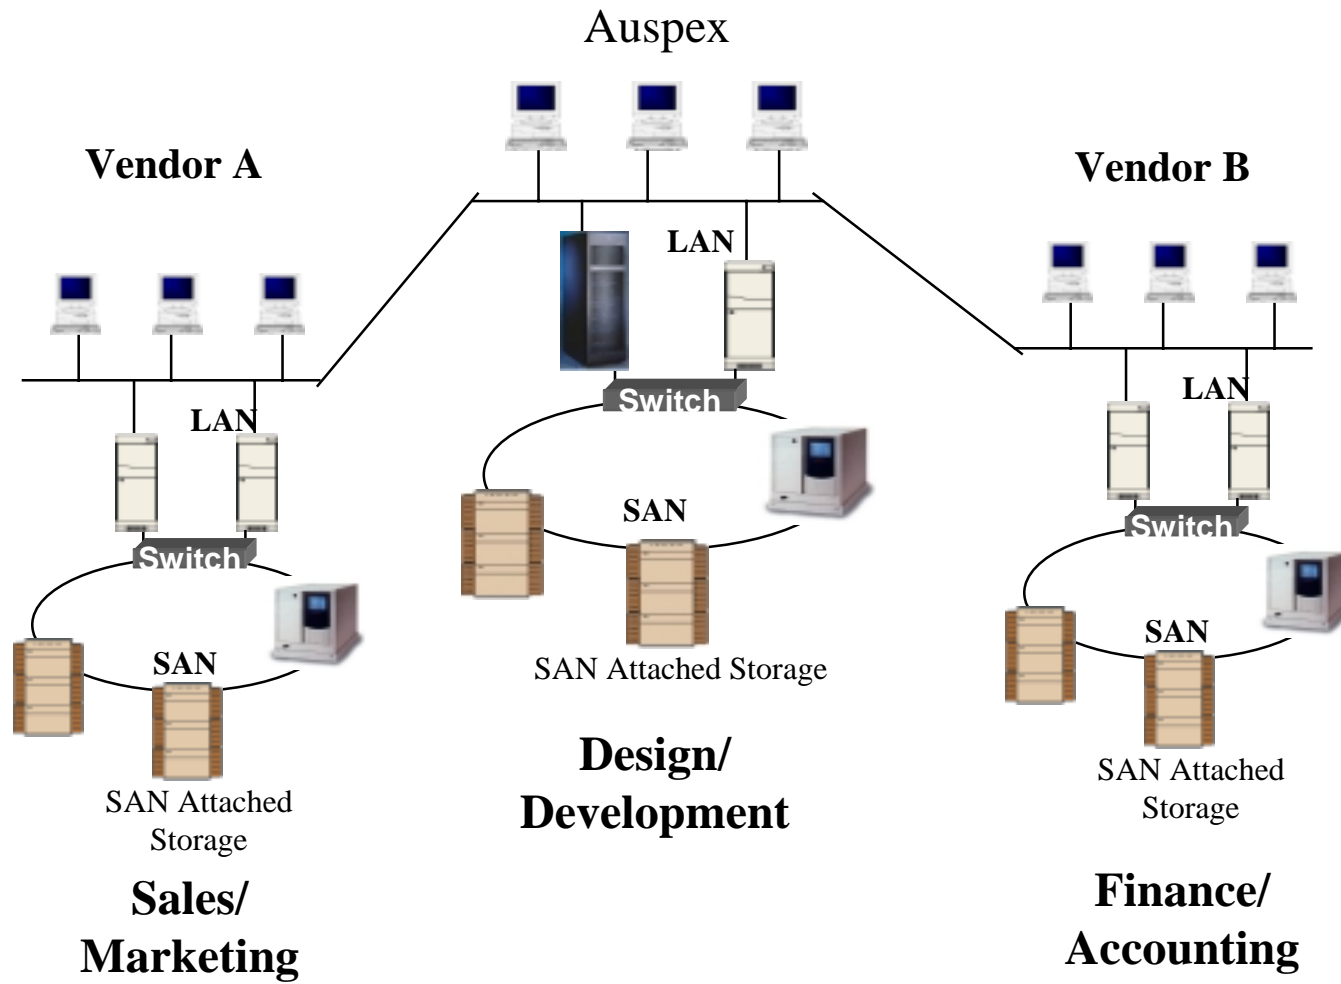

- ▼ Reduce data loss with remote replicas
- ▼ Effective e-Business content distribution
- ▼ Increase decision support capability
- ▼ Reach new markets faster
- ▼ Use data resources better

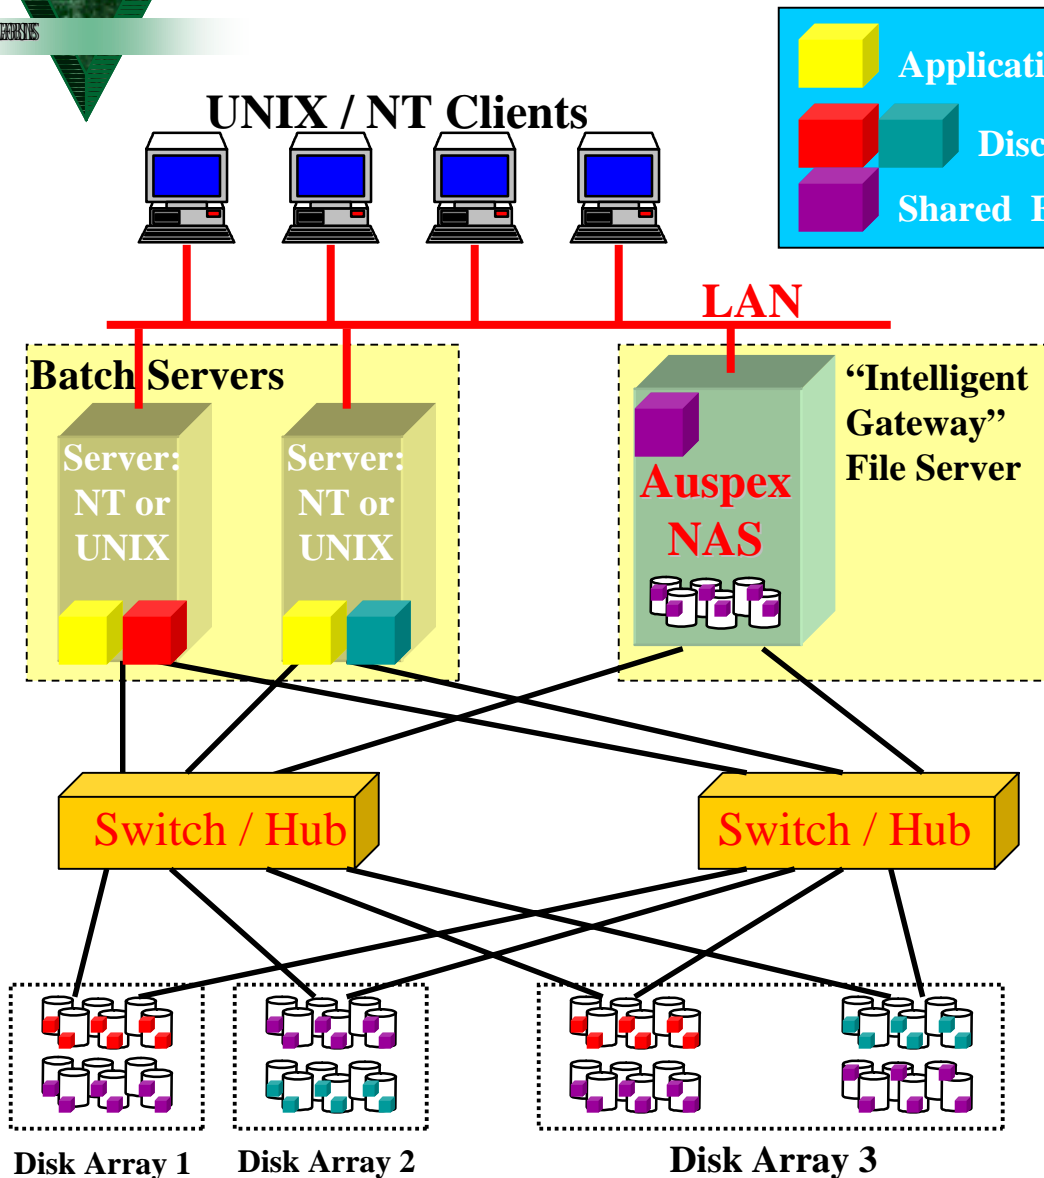

# Present: Islands of SAN

# Future: The “Intelligent Gateway”

## BENEFITS

- **Same as NAS PLUS...**
- **Application Response Time:** Speeds data delivery to clients
- **Offloads Servers:** Performs file serving of SAN data to LAN. Extends server investment and speeds application execution
- **Resource Utilization:** Utilizes SAN storage pool, delivers SAN backup resources to the network

# Benefits of SAN

## The Current Benefits of SAN

- ▼ Performance improvements on the LAN
- ▼ LAN-free, Serverless backup - the “Killer App”
- ▼ Larger networks over larger distances

## The Future Benefits of SAN

- ▼ Shared storage pools
  - Assign storage where needed
- ▼ Multi-vendor interoperability
  - Switches, storage, management utilities

# Conclusion

- ▼ Storage in a corporate environment is a powerful tool for corporate competitiveness
- ▼ NAS provides several advantages for storage consolidation, increased productivity, and cost reduction
